

Next Generation Lighting + Controls

Intelligent LED Luminaires featuring Leviton Intellect Control System

Viscor, a Leviton company now offers 6 Intellect enabled smart luminaires with 2 control options.

Select the control option that best fits your needs. Choose from a simple stand-alone solution like Intellect Solo or for, a more advanced lighting control system, use Intellect Wireless. These luminaires feature a stand-alone occupancy sensor with daylight harvesting or a wireless occupancy/daylight sensor that integrates into the new Intellect wireless control system.

**Shown here with the LRTH*

Features:

- Standard low voltage dimming (0-10v)
- Factory installed Intellect occupancy/daylight sensor (reducing cost on labor and wiring)

Applications:

- Offices and Boardrooms
- Corridors
- Retail Stores and Supermarkets
- Studio Lofts

Viscor range of products:
